

NATIONAL INSTITUTE OF ECONOMIC AND SOCIAL RESEARCH ESTIMATES OF MONTHLY GDP

Embargo until 15.00 hours on 12th June 2012

Our monthly estimates of GDP suggest that output grew by 0.1 per cent in the three months ending in May after declining by 0.1 per cent in the three months ending in April 2012. The UK economy has ceased to contract, but economic activity remains very weak. With the economy stagnant, the negative output gap is likely to widen further. We expect the UK economy to remain broadly 'flat' over the next 6 months. While significant downside risks persist, we expect economic recovery to begin to take hold in 2013.

Figure 1. The profile of recession and recovery

Calculated from three-month moving averages of monthly GDP.

The National Institute interprets the term "recession" to mean a period when output is falling or receding, while "depression" is a period when output is depressed below its previous peak. Thus, unless output turns down again, the recession is over, while the period of depression is likely to continue for some time. We do not expect output to pass its peak in early 2008 until 2014.

Our track record in producing early estimates of GDP suggests that our projection for the most recent three-month period has a standard error of 0.1-0.2% point when compared to the first estimate produced by the Office for National Statistics. This comparison can be made only for complete calendar quarters. Outside calendar quarters the figures are less reliable than this and they are also likely to be less accurate in the current disturbed economic circumstances.

A paper describing the methodology used to produce the data was published in the February 2005 volume of the *Economic Journal*. From April until October 2006 our estimates were computed using the Index of Services published by ONS. However this monthly series shows considerable volatility which has caused us some problems in estimating GDP. From our November 2006 press release we have therefore reverted to using a model of private services output based on indicator variables. This means that, while all our figures for calendar quarters are fully coherent with ONS data, our estimates of monthly private service output are not. The series can be thought of as indicating the underlying value of the ONS series.

For more information please telephone Dawn Holland on 020 7654 1921 or Katerina Lisenkova on 020 7654 1951.
