

Aims and Scope of the Special Issue

Sub-topic A: COP26 and Its Aftermath

Sub-topic B: Issues in Climate Sustainability

The first sub-topic will provide academics, policymakers and practitioners the opportunity to discuss and appraise the aims, objectives, achievements and failures of the COP26 process held in the UK in November 2021, and to articulate the challenges the COP process faces going forward.

The second sub-topic will provide researchers the opportunity to contribute original research applying economic and/or evidence-based argument to the areas of climate change mitigation and adaptation, energy, the environment, biodiversity, state regulation and energy governance, climate change and the macroeconomy, financial markets, and the relations among them.

Submissions can cover one of the two sub-topics, or a combination of both.

Our aim is to host a workshop to support the special issue in London in May 2023, giving participants the opportunity to share and gain insights into meaningful contributions to the field. Final drafts will be due on 24 May 2023.

Workshop Details and Submission Instructions

Manuscripts can be one of two types: a conventional research article of up to 6,000 words in length, or a shorter paper focused on a specific policy question, of up to 4,000 words in length. Selected authors are expected to take part in a hybrid event in May, hosted by the National Institute of Economic and Social Research where they can either present their paper in-person in London or join online. Presentation at the workshop does not at this point guarantee that your paper will ultimately be published.

After further selection and review, final papers will be part of a Special Issue on "Climate Sustainability" published by the National Institute Economic Review (Cambridge University Press) in 2023.

All submissions will undergo peer review. [Please submit your paper online](#), and select the appropriate article type "Climate issue" when submitting your paper.

Important dates

First draft due: 27 March 2023

Author Notification: 5 April 2023

Workshop: May 2023 (Date: TBA, tentatively week of 15 May 2023)

Final submission of papers: 24 May 2023

For questions regarding the special issue, please contact: Professor Arnab Bhattacharjee (A.Bhattacharjee@niesr.ac.uk)

About the *National Institute Economic Review*

The *National Institute Economic Review* is the peer-reviewed quarterly publication of the National Institute of Economic and Social Research, one of Britain's oldest and most prestigious independent research organisations. The Institute's objective is to promote, through quantitative research, a deeper understanding of the interaction of economic and social forces that affect peoples' lives so that they may be improved. The Review has a long history of publishing leading articles in macroeconomics, forecasting and the impact of events such as Brexit and Covid-19 on households and specific industries, publishing academic papers on applied public policy issues from the frontier in economics and related social sciences.

Guest Editors

Arnab Bhattacharjee (Heriot-Watt University and NIESR)

J. Roderick McCrorie (University of St Andrews)

Adrian Pabst (NIESR and University of Kent)
