

Call for Papers: Impact of Brexit

Aims and Scope of the Workshop

The National Institute of Economic and Social Research (NIESR) is hosting a one-day workshop on the “Impact of Brexit” on Friday 17 November, at NIESR’s Office, 2 Dean Trench Street, SW1P 3HE. The event will be in-person only.

Brexit has cast a long shadow over the UK economy, with its impact masked by the Covid-19 pandemic and the crisis in Ukraine. Disentangling those effects is not straightforward. This workshop will reevaluate the factors introduced and examine the ongoing impact of Brexit.

There will be contributions from academic and policy-oriented researchers and leading experts on International Economics, Trade, Economic Growth, Development and more broadly, the macroeconomic impacts of Brexit.

These include: Swati Dhingra (LSE and Bank of England), Thiemo Fetzer (University of Warwick and NIESR), Daniela Glocker (OECD), Stephen Millard (NIESR), Jonathan Portes (King’s College), Thomas Sampson (LSE), Alan Winters (University of Sussex), and Katrin Forster-van Aerssen and Tajda Spital (ECB).

Workshop Details and Submission Instructions

The workshop offers researchers, policymakers, and market participants an opportunity to share their insights and perspectives. We welcome submissions of full papers relevant to, but not necessarily restricted to, the following broad issues:

- The consequences of Brexit on GDP, trade, investment and labour
- Impact on UK citizens: opportunities and free movement
- Firm-level impacts of Brexit
- The financial sector
- Post-Brexit economy
- Inflation

Important Dates

First draft due: Thursday 31 August 2023

Workshop: Friday 17 November 2023

Please send all completed papers to Hailey Low - h.low@niesr.ac.uk

About the *National Institute Economic Review*

The *National Institute Economic Review* is the peer-reviewed quarterly publication of the National Institute of Economic and Social Research, one of Britain's oldest and most prestigious independent research organisations. The Institute's objective is to promote, through quantitative research, a deeper understanding of the interaction of economic and social forces that affect peoples' lives so that they may be improved. The Review has a long history of publishing leading articles in macroeconomics, forecasting and the impact of events such as Brexit and Covid-19 on households and specific industries, publishing academic papers on applied public policy issues from the frontier in economics and related social sciences.
